Re: LightSquared Subsidiary LLC Request for Modification of its Authority for an Ancillary Terrestrial Component

Dear Ms. Dortch:

I am a small business owner in Pevely, Missouri. I am writing to ask that you support LightSquared and their effort to expand the broadband infrastructure in smaller communities all over the country. Business owners need access to reliable telecommunications options to remain competitive and efficient. Improved broadband access would help businesses such as mine, particularly as I look to grow my customer base. Currently the Pevely market is underserved by broadband service providers and as such, I'm not able to leverage the full benefits of the internet.

As you know, with the FCC's approval, LightSquared is ready to roll out a next-generation 4G-LTE wireless network that will be backed by the world's largest communications satellite, improving reliability for users everywhere.

I am confident that the FCC review process will identify a win-win solution to enable LightSquared to deploy their network and ensure there is not interference with other devices such as those that utilize GPS. Please continue the FCC work so that business owners like me might finally have better wireless service in communities like Pevely.

Thank you for your consideration.

Sincerely,

Jamie Allen
